WARRANTY BOOSTER GUIDE

GET COVER FOR ITEMS NOT COVERED BY YOUR OEM WARRANTY

Not all components are covered by a manufacturer warranty for the full term of the warranty.

Get a Warranty Booster to keep you covered for longer.

WHAT IS A WARRANTY BOOSTER?

This policy provides you with additional cover on selected components that have limited cover, or are excluded from the manufacturer's warranty in the event of unexpected mechanical or electrical breakdown of your vehicle. This warranty is applicable to all new passenger and light commercial vehicles and runs concurrently with the vehicle's manufacturer's warranty for a period of 7 years or 200 000 kilometres, whichever happens first.

BENEFITS

- Takes care of unexpected mechanical and electrical breakdowns or malfunctions
- Qualified KIA technicians and genuine Hyundai parts
- Fixed, affordable monthly cost
- Can be transferred to the next owner and increase resale value

ELIGIBILITY

Your vehicle qualifies for a Warranty Booster if it:

The policy covers all new passenger and light commercial vehicles with a maximum gross vehicle mass (GVM) of 3 500kg that have a 7 year manufacturer's warranty at the date the vehicle was purchased.

New passenger and light commercial vehicles are those that are less than 2 years old and have done less than 40 000km at the time the policy was purchased.

WHEN DOES THIS POLICY START?

This policy starts on the date of first registration of the vehicle, which is the same date that the vehicle's manufacturer's warranty starts and both the **OEM** and this Booster warranty will be active at the same time.

Should this policy be purchased when the vehicle is less than 2 years old or has travelled less than 40 000km, this policy will only provide cover from the date of purchase of the policy until the vehicle is 7 years old or reaches 200 000km on the odometer, whichever happens first.

WARRANTY BOOSTER

Subject to terms & conditions of the underlying policy

- Air conditioner
- Clutch
- Battery
- Shock Absorbers
- Management System
- Electronic Ignition
- Cooling System
- Braking System
- Fuel System
